

# CAREER DEVELOPMENT TALK BY GETME HIRED AND PPG

2u2i First Year Student Meet and Greet Session 23/24

- 📍 Location:
- Dewan Seminar N28 (GetMe Hired)
  - Hutan Rekreasi UTM (PPG)

## INTRODUCTION

On Monday, 23 October 2023, GetMe Hired had organized a talk about our career development in the future. He talked about the difference of infographic resume and CV. Besides that, while on Saturday, 28 October 2023, PPG had organized a talk about our career development in the future as a data engineer students. Through the talk, we had been introduced with multiple softwares that commonly used in the industry such as SQL, PHP, Microsoft Azure and Power BI. Through the talks, we have understand the differences and unique of data engineering among the faculty of computing.

## Reflection

Based on the talk by Mr. Habib, we learned that using CV instead of writing infographic resume. This is because CV is easier to read and understandable by the industry. Besides that, using CV can help us to write more valuable contents about ourselves, so that the employer can know more about our talents and value us. Finally, it is easier for us to explain the contents while doing the interview with the industry. While based on the talk by PPG, we know that the innovation of PPG are used in our daily life. For example, the ID card plate was invented by them so that it is not easily break. Besides that, we must also always have open-minded altitude, curious and eager to learn new things, adaptable to the new environment, and having positive mindset while working in the industry. Finally, we also learn that the best experience we can obtain to benefit us while working in the industry is Get an opportunity to deal with Big Data, having a top-of-line tool from Microsoft Azura, friendly to employer and employee, and having supportive friends.

## Way Forward

### GetMe Hired

- Using their formula to help more clients to land their job offer on their desired company

### PPG

- Increase the number of technology centers around the world
- Seek for more talented students to hire them
- Reaching their sell's targets

## Lesson Learned

Through both of the talked, I have learned that:

- I must encourage myself to explore new things to increase my knowledges learn new skills. For examples, critical thinking skills and communication skills.
- I must motivate ourselves to join many activities such can programming competition and some group activities to improve social skills.
- I can apply for some part-time jobs to gain some working experience, which most companies mostly focus on.

## Executive Summary

In conclusion, GetMe Hired and PPG talks have gave us many benefits and understanding about future career development in the field of data engineering. It also shows that how much the data engineering field expert is needed by every companies and industries for their breakthrough in innovation such as artificial intelligence, large and more evolved database system and automation in data sorting.

## Content

### GetMe Hired

#### 3 Big Decision

1. What job
2. Where to stay
3. Who is your life partner and best friend

#### Job Application Flow

- Identify
- Research
- Prepare
- Apply

### PPG

#### Fundamental Knowledges

- Programming skills
- Database concepts and Design
- Data Modelling and Visualization

#### Soft Skills

- Communication (with technical and non-technical personnel)
- problem-solving
- critical thinking skills
- logical and analytical thinking

### Aims After Finish On Study

- Continue study in Master and Phd
- Apply job in Huawei or Petronas as data analyst or data engineer
- Become lecturer in Matric or UTM
